

# ***IMAGE DISPLAY DEVICE AND METHOD THEREOF***

## **Abstract of Disclosure**

A liquid crystal display includes a first TFT for controlling a supply of a display signal to a pixel electrode, a second TFT connected to the first TFT, and a third TFT connected to a data line. The third TFT controls the supply of a display signal to the pixel electrode. The second and third TFTs are connected to a gate line  $G_{n+1}$ , and the first TFT is connected to a gate line  $G_{n+2}$ .
